Mouloud EL ARRAM

Software Engineering Student at Sorbonne University's Engineering School
Paris, Île-de-France, France

Summary

I am an ambitious first-year student enrolled in the prestigious engineering school "Sup-Galilée" at Sorbonne University, Paris. Pursuing a degree in Computer Engineering with a specialization in Software Engineering and Networks, I have acquired a strong command of software development principles, bolstered by a sound understanding of engineering mathematics.

As a collaborative team player, I possess a deep-rooted passion for expanding my knowledge and developing new skills. I have honed my expertise through practical exposure gained in the capacity of a full-stack developer at two IT companies. My previous roles equipped me with hands-on experience in working on mobile and web development projects utilizing industry-leading technologies such as Flutter and Symfony.

I am eager to leverage my talents and augment my capabilities to contribute meaningfully to dynamic teams in the future.

Experience

Abeille Assurances

Software Engineer

September 2023 - Present (7 months)

Bois-Colombes, Île-de-France, France

As a Programmer Analyst, I engage in the complete software development lifecycle, utilizing my software engineering skills to plan, design, implement, and test software applications.

E.Leclerc

Versatile employee

November 2022 - September 2023 (11 months)

E.Leclerc EPINAY SUR SEINE, 159 Rte de Saint-Leu, 93800 Épinay-sur-Seine

I process transactions on a daily basis for a French-origin, multi-billion dollar predominantly food retail company and its industry.

BIG4COM

Full Stack Developer (Flutter & Symfony 5)

April 2022 - September 2022 (6 months)

City of Innovation Marrakech

During my first month at Big4Com, I worked on an application called BROKER, which is a mobile and web app for renting accommodations and booking taxis (both front office and back office). For the development of the mobile (front end), I used Flutter, while Symfony was used for the web development (back end).

As part of a team of three, I worked on an e-learning platform where I was responsible for developing the mobile version using React-native with "react-native CLI."

Furthermore, I was the representative of Big4Com in the innovation cite of Marrakech.

Samabcom

Web developer Symfony 4

June 2021 - July 2021 (2 months)

Housing estate hamza avenue Saudi Arabia n°25, 2nd floor, Tangier

During this internship, I worked on two distinct projects. The first project involved the development of the company's website, while the second project focused on creating an e-commerce web application.

Education

Sup Galilée

Engineering degree, Computer Software Engineering · (September 2022 - September 2025)

Higher School of Technology of Essaouira - Cadi Ayyad University

Technical University degree, Computer Software Engineering · (September 2020 - September 2022)

Mohamed V High School of Essaouira

Baccalaureate, Mathematical Sciences B French option · (September 2019 - July 2020)
